

CAMBERWOOD CHILDREN'S HOSPITAL
DISCHARGE SUMMARY

Patient: BYRNE, Thomas
UR: 4471902
DOB: 14/03/1990
Admitted: 12/03/1998
Discharged: 02/04/1998
Unit: General Paediatrics - Dr Helen Nkemelu

Principal diagnosis
Coeliac disease, established 1997, currently well controlled.

Secondary
Iron deficiency without anaemia. Short stature, improving.

Course
Admitted for review of growth faltering and dietary reassessment. Serology 16/03/1998 within normal limits. Dietitian review confirmed good adherence with occasional inadvertent exposure at school. No inpatient complications.

Social
Ongoing family court proceedings between the parents. Social work involved (M. Kowalczyk). Contact arrangements are the subject of a departmental notification; ward staff to direct all enquiries from Gerald Byrne to the treating team rather than provide information by telephone.

Discharge medication
Ferroous sulfate 65 mg daily for eight weeks.

Follow up
Paediatric outpatients six weeks. Repeat serology in three months.
GP: Dr Anwar Siddique, Preston Family Practice, (03) 9478 1120.
